

NUTRITION, HEALTH, AND PHYSICAL FITNESS

The board recognizes that a healthy school environment is important. The board supports the District's increased emphasis on nutrition, health and physical education, and physical activity at all grade levels to enhance the well-being of the District's students. Therefore, it is the policy of the Board of Directors to provide students with access to nutritious food; emphasize health education and physical education; and provide students with opportunities for physical activity.

Wellness Policy

The District will develop and implement a wellness policy in compliance with state and federal requirements for districts participating in the National School Lunch Program, the School Breakfast Program and the United States Department of Agriculture (USDA) Smart Snacks in School nutrition standards.

The District will convene a wellness committee to establish goals for the District-level wellness procedures and to oversee its development, implementation, periodic review and updating. Various parties will be encouraged to participate, including but not limited to: parents, students, teachers, health professionals, school administration, board members, and members of the general public.

Nutrition and Food Services Program

The Board of Directors supports the philosophy of the National School Lunch and School Breakfast Program and will provide wholesome and nutritious meals for children in the District's schools. The Board authorizes the Superintendent to administer the food services program, provided that any decision to enter into a contract with a food service management company will require the approval of the Board. Expenditures for food supplies shall not exceed the estimated revenues.

The Superintendent is responsible for:

- distributing meal applications and determining eligibility for school meals;
- protecting the identity of students eligible for free and reduced-price meals;
- ensuring meals meet USDA meal pattern requirements;
- ensuring meal periods are in compliance with USDA regulations;
- establishing a Food Safety Plan;
- determining meal prices and submitting them to the board for approval annually;
- using the full entitlement of USDA Foods;
- maintaining a nonprofit school food service account;
- ensuring all revenues are used solely for the school meal program;
- establishing a meal charge policy;
- accommodating children with special dietary needs;
- ensuring compliance with USDA nondiscrimination policies;
- following proper procurement procedures; and
- ensuring compliance with the Smart Snacks in School standards.

Health and Physical Education Program

The District's K-12 health and physical education programs will be aligned with the Washington State Health and Physical Education K-12 Learning Standards and will include, but not be limited to, the development of knowledge and skills to be physically active, to eat nutritiously, to access reliable health information and services, to communicate effectively, and to set health-enhancing goals.

The District will ensure that the following requirements are met:

- All students in grades one through eight receive an average of one hundred instructional minutes per week of physical education (as defined by OSPI) per year.
- All high school students are required to complete a minimum of three semesters (1.5 credits) of physical education and one semester (.5 credit) of health education.
- Physical education will be available for each grade in high school.
- All students have equal and equitable opportunities for health and physical education.
- All students, from kindergarten through grade 12, will participate in a quality, standards-based health and physical education program.
- OSPI-developed assessments or other strategies will be used in health and physical education, formerly known as classroom-based assessments (CBAs).

Additionally, the district will conduct an annual review of its PE programs. The review may consist of numerous provisions, including but not limited to:

- the number of individual students completing a PE class during the school year;
- the average number of minutes per week of PE received by students in grades 1 through 8, expressed in appropriate reporting ranges;
- the number of students granted waivers from PE requirements;
- an indication of whether all PE classes are taught by instructors who possess a valid health and fitness endorsement;
- the PE class sizes, expressed in appropriate reporting ranges;
- an indication of whether, as a matter of policy or procedure, the district routinely modifies and adapts its PE curriculum for students with disabilities; and
- an indication of whether the district routinely excludes students from PE classes for disciplinary reasons.

As a best practice and subject to available funding, the District will strive to ensure:

- Students will be moderately to vigorously active for at least 50% of class time during most or all physical education class sessions.
- All schools will have certificated physical education teachers providing instruction.
- All schools will have appropriate class sizes, facilities, equipment, and supplies needed to deliver quality health and physical education consistent with state standards.

Physical Activity

Physical education class should not be used or withheld as punishment. Removal from physical education courses will follow appropriate school rules. All schools, as a best practice and subject to available funding, will participate in a multi-component approach by which schools use all opportunities for students to be physically active, such as the Comprehensive School Physical Activity Program (CSPAP) recommended by the Centers for Disease Control and Prevention, and will provide the following:

- quality physical education;
- physical activity during the school day (brain boosters/energizers);

- physical activity before and after school;
- recess;
- family and community engagement;
- staff wellness and health promotion;
- active transportation; and
- school district facilities.
